User Manual: Magnetic Car Mount for iPhone – 3mk MagHolder™

1. Product Introduction

MagHolder™ is a professional magnetic car mount designed for iPhones, crafted to securely and safely hold your phone while driving, providing convenient access to navigation and calls.

2. Kit Contents

- MagHolder™
- Vent clip
- Adhesive magnetic rings – 3 pcs.
- Packaging

3. Features

- 16 strong magnets ensuring stable phone mounting in all driving conditions
- Rotating head allowing quick angle adjustment of the phone
- Simple installation to the vent grille using a clamp – no drilling or gluing
- Can be mounted vertically or horizontally, depending on preference
- Compatibility with MagSafe technology and, with the included magnetic rings, with other smartphone models

4. Technical Specifications

- Model name: 3mk MagHolder™
- Model number: 3mk-MGODR
- Number of magnets: 16 pcs.
- Mounting method: clamp attached to the vent grille
- Adjustment: rotating head
- Compatibility: iPhone with MagSafe technology and other smartphones (using the included magnetic rings)
- Mounting location: vent grille, vertically or horizontally

5. Usage Instructions

Mount Installation

1. Choose the installation location: select the appropriate vent grille slat and decide whether the mount should be installed vertically or horizontally.
2. Attach the clip: clamp the mount's clip onto the selected vent grille slat until it is securely attached.
3. Check stability: gently move the mount to confirm it is correctly and securely attached.

Phone Mounting

1. Prepare the phone: if your phone does not have MagSafe technology, attach one of the included magnetic rings to its case.
2. Mount the phone: place the phone onto the mount's head – the magnets will automatically and securely hold it

in place.

3. Adjust the viewing angle: rotate the mount's head to position the phone in the most comfortable and safest position before driving.

6. Cleaning and Regular Inspection

Periodically check the clamp and mount head to ensure they are correctly and securely attached. Clean the mount with a dry or slightly damp cloth, avoiding strong chemicals that could weaken the magnets or damage the casing.

7. Safety and Warnings

- Never adjust the mount, attach, or remove the phone while driving – perform these actions only when stationary, with the engine off or in a parking area.
- Before each journey, check that the clamp is securely attached to the vent grille slat and that the mount head does not move loosely.
- Ensure the mount and phone do not obstruct the driver's view or restrict access to vehicle controls.
- Strong magnets may interfere with magnetic cards, contactless tickets, and other data carriers – do not store them in close proximity to the mount.
- Individuals with pacemakers or other implanted medical devices should exercise caution and consult a

doctor before using the mount due to the strong magnetic field.

- Improper clamp installation or excessive force during mounting may damage the vent grille or phone casing.
- Do not expose the mount to high temperatures (e.g., left in the sun in a closed car) – this may weaken the magnets.
- The product is not intended for children and should be kept out of their reach.

8. Maintenance and Storage

- If the mount is not used for an extended period, remove the clip from the vent grille and store it in a dry, cool place, away from moisture and high temperatures.
- Do not store the mount near data carriers sensitive to magnetic fields (credit cards, contactless tickets, external drives).
- Avoid dropping and striking the mount – this may permanently weaken the magnets or damage the rotating head mechanism.
- Before long-term storage, clean the mount according to the guidelines in section 6 to prevent dust and dirt from accumulating on the magnet surfaces.
- Store adhesive magnetic rings in their original packaging until use to maintain their adhesion.

9. Warranty

Improper use or incorrect placement of this product by users may result in reduced lifespan or damage, and any resulting damage is not covered by the warranty. The warranty covers manufacturing defects and material faults. The manufacturer's warranty is 24 months.

10. Disposal and Recycling Information

The product should be disposed of in accordance with local waste management regulations. At the end of its life, take the product to a selective waste collection point. Metal components are recyclable.
