Product presentation:

1. Wireless charging for Apple Watch
2. Wireless charging with MagSafe
3. Built-in USB-C to Lightning cable
4. Built-in USB-C cable
5. LED display
6. Power button
7. USB-A port
8. USB-C port

Product description:

PastelUp™ - is an elegant and functional device that allows you to charge multiple devices simultaneously. Dedicated to Apple products, the set includes a USB-C to Lightning cable and a USB-C cable, ensuring versatility and convenience. Thanks to compatibility with MagSafe technology and the ability to wirelessly charge the Apple

Watch, PastelUp™ offers modern solutions for demanding users. Additionally, the power bank is equipped with a clear LED display that shows the charge level. Available in 4 colours.

Set includes:

- 3mk PastelUp™ power bank
- User manual

Technical specifications:

- Model name: 3mk PastelUp™
- Model number: depending on colour:
 - black PB-DAS-10-BLA
 - pink PB-DAS-10-PIN
 - blue PB-DAS-10-BLU
 - white PB-DAS-10-WHI
- Battery capacity: 10000 mAh (3.7V/37Wh)
- Output current USB-C: 3A max.
- Output current USB-A: 4.5A max.
- Output voltage: 5V, 9V, 12V
- Input voltage: 5V, 9V
- Connector type: USB-A, USB-C, Lightning
- Wireless charging: 15W max.
- Wireless charging for Apple Watch: 3W
- Compatibility: MagSafe / Qi

- Battery lifespan information: Up to 500 charging/discharging cycles.
- Radio data: Radio power: 5W, Frequency: 100-205 kHz.
- Material: ABS plastic / silicone
- Charging time of power bank from 0% to 100%: 3.5h

User manual:

1. Charging the power bank:
 - Connecting to power: Connect the USB-C cable to the Type-C input of the power bank. Connect the other end of the cable to a wall charger or another USB power source.
 - Monitoring the charging status: The LED display on the power bank indicates the battery charge level in percentage values.
2. Charging devices:
 - Using the built-in USB-C cable: Pull out the built-in USB-C cable from the power bank and connect it to the device you want to charge.
 - Using the built-in USB-C to Lightning cable: Pull out the built-in USB-C to Lightning cable from the power bank and connect it to a device with a Lightning port (e.g. iPhone), and connect the USB-C end to the Type-C port on the power bank.
 - Using the USB-A port: Connect the USB-A cable to the USB-A port on the power bank, and connect the other end of the cable to the device you want to charge.

3. MagSafe wireless charging:
 - Place the wireless charging compatible device on the designated MagSafe wireless charging spot on the power bank.
 - Ensure that the device is correctly positioned and charging will begin.
4. Charging the Apple Watch:
 - Place the Apple Watch on the designated charging area on the power bank.
 - Ensure that the Apple Watch is correctly positioned and charging will begin.
5. Pass-Through technology - The power bank is equipped with Pass-Through technology, meaning you can charge the power bank and connected devices at the same time.

Precautions and maintenance:

- Store in a dry place, avoid contact with water, do not overheat.
- Keep away from children: risk of choking, electric shock, or burns.
- Do not use damaged power banks: Damaged components may pose a fire or explosion hazard.
- Avoid contact with water: risk of electric shock, short circuit, or explosion.
- Do not expose to high temperatures: risk of overheating, explosion, or fire.

- Warnings: Do not disassemble, keep away from children, do not use in extreme temperatures.
- Maintenance: Store the power bank in a dry and cool place and regularly charge the power bank, even if not in use, to maintain its capacity.

Tips

Due to the processing, the nominal output capacity is lower than the battery capacity.

1. To turn on the power, press the power button. The display will show bright LEDs indicating the charge level of the power bank. To turn off the power, perform a single click of the power button. If the power bank is not connected, it will automatically enter standby mode after 30 seconds.
2. To ensure the long lifespan of the device, we recommend periodically charging the power bank (at least once every 5 months).
3. Improper use of the product may cause damage and pose a risk to people and property.
4. The consumer is responsible for any damage to persons and property resulting from non-compliance with the user manual or ignoring warnings. The company will not be held legally liable in such cases.
5. It is strictly forbidden for unqualified persons to disintegrate this product. Non-compliance with this prohibition results in the loss of all warranties.

6. Avoid connecting household appliances or loads exceeding its output current (which protects the circuit) to this product.
 7. Avoid exerting intense physical actions on the product, such as tapping, throwing, stepping on, or squeezing.
 8. It is not recommended to use high-voltage chargers (above 35W) or to allow the power bank to discharge completely. We recommend recharging when the charge level drops to 10%. The device should be powered only by a 3mk charger with a maximum power of 35W and the USB cable included in the package. Even if not in use, the power bank should be regularly recharged.
- If the power bank requires charging, connect it to a power source. The device will automatically cut off power when fully charged - you do not need to worry about overcharging the battery. This is one of the many safeguards we have implemented in this device to improve battery quality and extend its lifespan.
- Note:** Do not charge the power bank if there are any signs of damage, a leaking or swollen battery. It is also prohibited to connect the device to unknown, unverified, or faulty power sources.
- During the charging of the power bank, do not leave the device unattended. Ensure that the power bank is in a well-ventilated place, away from flammable materials and heat sources.

Warranty:
Improper use or incorrect placement of this product by users may result in a shortened lifespan or damage, and any resulting damages are not covered by warranty or are not the manufacturer's responsibility. The warranty covers manufacturing defects and material faults. The manufacturer's warranty is 24 months.

Information on disposal and recycling:

This symbol on the product, battery, documentation, or packaging indicates that products and batteries should be handed over to designated waste collection points established by local authorities after their useful life. This ensures that WEEE waste is recycled and processed in a way that protects valuable materials and safeguards human health and the environment.

Declaration of conformity:

Hereby, 3mk Protection declares that the product complies with the relevant EU harmonisation legislation: 2014/53/EU; 2011/65/EU; (EU) 2023/154. The full text of the declaration of conformity is available at the following website (3mk.global/manual).
