

Pocket Powerbank 5 000 mAh™

Powerbank

User manual

EN

Product Description:

The 3mk Pocket Powerbank 5,000mAh™ is a high-quality compact device equipped with features that facilitate monitoring the charge level thanks to the built-in LED display.

It has protections against surges, overheating, and short circuits, ensuring complete safety during use.

We recommend using and storing the product at temperatures between 0°C and 35°C to ensure its long-lasting performance.

Package Contents:

1. Powerbank
2. User Manual
3. USB-C/USB-C Charging Cable

Technical Specification:

- Model Number: PP-5000
- Battery: Lithium-Polymer
- Battery Capacity: 5,000mAh 3.7V / 18.5Wh
- Nominal Capacity: 3,100mAh (5V/2.4A)
- Input Voltage: 5V
- Input Current: 2.4A
- Output Voltage: 5V
- Output Current: 2.4A
- Connector Type: USB-C

- Number of Charge Cycles: 600
- Compatibility: Smartphones, headphones, tablets
- Warranty: 24 months

Device Charging:

1. Before starting the charging process, ensure that the input voltage of the device being charged is compatible with the output voltage of the powerbank.
2. Connect the device using the appropriate cable to the USB-C port in the powerbank.
3. Press the power button to begin the charging process. The LED display will light up indicating the charging progress.

Powerbank Charging:

1. Use the included USB-C cable, connect the powerbank to a power source (wall charger, computer).
2. Full charging takes about 2.5 hours.

Usage Tips:

- The nominal output capacity may be lower than the battery capacity due to processing losses.
- The powerbank will automatically enter sleep mode after 30 seconds if not connected to any device.
- To maintain optimal battery life, we recommend charging the powerbank at least once every 5 months.

It is not recommended to use high-voltage (charge above 35W) chargers or to allow the powerbank to fully discharge. We recommend recharging when the charge level drops to 10%. The device should only be powered using a 3mk brand charger with a power not exceeding 35W and the USB cable included in the package. Even if not in use, the powerbank should be regularly recharged.

If the powerbank needs charging, connect it to a power source. The device will automatically stop charging when fully charged – there is no need to worry about overcharging the battery. This is one of the many safety features we've built into this device to improve battery quality and extend its lifespan.

Safety Information:

1. Keep away from children: risk of choking, electric shock, or burns.
2. Avoid contact with water: risk of electric shock, short circuit, or explosion.
3. Do not use damaged powerbanks: they may pose a fire or explosion hazard.
4. Do not expose to high temperatures: risk of overheating, explosion, or fire.

Warnings:

- Do not disassemble the device, doing so may void the warranty.
- Avoid connecting devices that exceed the maximum output current.
- Do not subject the powerbank to intense impacts, shocks, or excessive squeezing.

Note: Do not charge the powerbank if there are any signs of damage, leaking, or a swollen battery. You should also not connect the device to unknown, unverified, or faulty power sources. When charging the powerbank, do not leave the device unattended. Ensure that the powerbank is in a well-ventilated area, away from flammable materials and heat sources.

Warranty:

Improper usage or incorrect placement of this product by users may result in a reduced lifespan or damage, and any damages resulting from this are not covered by warranty or are the manufacturer's responsibility. The warranty covers manufacturing defects and material faults. The manufacturer's warranty is 24 months.

Information on disposal and recycling:

This symbol on the product, battery, documentation, or packaging indicates that products and batteries should be handed over to designated waste collection points by local authorities after the end of their service life. This ensures that WEEE waste is recycled and processed in a manner that protects valuable materials and human health as well as the environment.

Declaration of Conformity:

Hereby, 3mk Protection declares that the product complies with the relevant EU harmonisation legislation: 2014/30/EU, 2011/65/EU, and (EU) 2023/154. The full text of the declaration of conformity is available at the following web address: 3mk.global/manual.
