

## Lens Protection Pro™

Tempered glass

User manual

EN

### Set contents:

- 1 piece of Lens Protection Pro™
- Moist cloth
- Dry cloth
- User manual

### Technical specifications:

- Model name: Lens Protection Pro™
- Material: Tempered glass/aluminium
- Hardness: 9H
- Thickness: 0.4 mm

### How to use:

1. Before starting installation: Ensure that the camera surface is clean, dry, and free from dust. Prepare the mounting accessories.
2. During application: Install the glass in a clean, dust-free environment to avoid contamination between the glass and the camera. Do not bend the glass – it is pressure-resistant but can break under bending. Align the glass precisely with the edges of the camera to prevent it from peeling off.
3. After installing the glass: Avoid excessive pressure on the edges, especially when carrying the phone without a protective case. Regularly check the condition of the glass to ensure there are no chips or cracks. Damaged glass requires immediate replacement to avoid injury.

4. In case of damage: If the glass breaks, be careful when removing it to avoid injury from shards. Dispose of worn-out glass according to local glass waste regulations.

### Safety warnings

1. Do not modify the glass in any way. Such actions will void the warranty.
2. Use the product only for its intended purpose.
3. Packaging materials should be disposed of in accordance with locally applicable regulations.
4. It is recommended to use the glass in combination with a protective case for full protection of the device.
5. Avoid extreme temperatures, which may affect the adhesive used to secure the glass (e.g., leaving the phone in the sun).

### Warranty

Improper use or incorrect placement of this product by users may result in reduced lifespan or damage, and any resulting damage is not covered by the warranty or is outside the manufacturer's liability. The warranty covers manufacturing defects and material faults. The manufacturer's warranty is 12 months.

### Disposal and recycling information

This symbol on the product, battery, documentation, or packaging indicates that products and batteries should be handed over to designated waste collection points set up by local authorities at the end of their service life. This ensures that WEEE waste is recycled and processed in a way that protects valuable materials and safeguards human health and the environment.
