Safety instructions for using the 3mk Sapphire Lens on the device's camera

When installing, using, and removing the product, please follow these safety precautions:

- When installing, be careful not to damage the edges of the glass – they may be prone to cracking under strong pressure or impact.
- Do not bend the glass – it is pressure-resistant, but may crack under bending, posing a risk of injury.
- Regularly check the condition of the glass to ensure there are no chips or cracks.
- Avoid excessive pressure on the edges, especially when carrying the phone without a protective case.
- Tempered glass provides extra screen protection, but it is not unbreakable. Drops from a great height or impacts may cause it to break.
- If the glass cracks, exercise caution when removing it to avoid injury.
- Dispose of used glass in accordance with local regulations regarding this type of waste.
- Store removed glass out of reach of children.
- Avoid extreme temperatures that may affect the adhesive bonding the glass (e.g. leaving the phone in the sun).
- Use the product only for its intended purpose.
